

Rocketship

Timeflies

You always hear if people saying that knew from the star
See everybody's got a reason that they're falling apart
And after all, no one told me that it wouldn't be hard
To fly
And I remember when they try to tell me it was too far
But I

Built a rocketship so I could get away
Take me everywhere I want to go
Maybe one day I'll look back and wish I'd stay
But even rocketships can't take me home

And now it feels kinda' strange being all on my own
'Cause a man is stuck up on his rocketship
And all I'm trying to do is get home
And I'm just sitting here looking back thinking if I had known
Would I
Would I be wishing that I made this decision instead of being a
lone
'Cause I

Built a rocketship so I could get away
Take me everywhere I want to go
Maybe one day I'll look back and wish I'd stay
But even rocketships can't take me home

You always hear if people saying that knew from the star
But I

Built a rocketship so I could get away
Take me everywhere I want to go
Maybe one day I'll look back and wish I'd stay
But even rocketships can't take me home

Built a rocketship so I could get away
Take me everywhere I want to go
Maybe one day I'll look back and wish I'd stay
But even rocketships can't take me home
