

# If There Is Something

Tin Machine

If there is something  
That I might find  
Look around corners  
Try to find peace of mind

I say wherever you go  
If you leave  
Tryin' to keep a straight course is not easy

Something is special  
Looking at me  
Some kind of reaction  
When it comes down to me

Look around baby  
Too easy to say  
When this earth is just a game

I would do anything for you  
I would come all day  
I would swim all the oceans blue  
I would a thousand miles  
Driven by secrets  
More than enough for me to share

I would put roses around the door  
Sit in the garden  
Growin' the day holds by the score

She could ask I will give bold detail  
Takes me right back (when you were young)  
From your past and skip into the air  
Watch them fall down (when you were young)

Your love  
I feel you around me all the time  
You used to fall apart (when you were young)  
Your love  
I feel you put them all around  
The hills were higher (when you were young)  
Your love  
I feel you put them all around  
The trees were taller (when you were young)  
Your love  
I feel you put them all around  
The grass was greener (when you were young)  
Your love  
I feel you put them all around  
This road (when you were young)
