# Pretty Young Thing

**Tina Cousins**

I want to bruise your lips with a tender kiss
I want to crush your heart
I want to be your spark
And when you're touching me
I hear a symphony
Baby, come on now baby
Someone get a priest or maybe the police
I think that we should call a justice of the peace
You're a pretty young thing, its a damn cool thing
I got to tell the world in case they haven't heard
There never was a doubt, baby hush your mouth
You're a pretty young thing, its a damn cool thing
Baby say my name, baby say it again
I want to be the one, I want to take you on
And when you're closing in, I hear violins
Baby, come on now baby
Someone get a priest or maybe the police
I think that we should call a justice of the peace
You're a pretty young thing, its a damn cool thing
I got to tell the world in case they haven't heard
There never was a doubt, baby hush your mouth
You're a pretty young thing, its a damn cool thing
Pretty young thing, don't need no diamond ring
I'll give you everything, I'll show you anything
Just hush
Oh just shhh
Don't say a word
Someone get a priest or maybe the police
I think that we should call a justice of the peace
You're a pretty young thing, its a damn cool thing
I got to tell the world in case they haven't heard
There never was a doubt, baby hush your mouth
You're a pretty young thing, its a damn cool thing
