## **Don't Ever Get Tired**

## **Tindersticks**

Learn to live, learn to love Learn to feel happy Learn to recognize Where the joy lies

Learn to sing, learn to move Your foot tapping on the side You've been watching them For all of your life

And don't let those moments Pass you by You set your slightest step To the inside

It's another year
You're still around
Can I touch you to make sure
How you tire of waiting for me

Don't ever get tired
Of waiting for me
I've been wanting to
All this time
You set your slightest step
To the inside

I've been wanting to
All this time
You set your slightest step
To the inside
