

# Shadows

Tinie Tempah

You are more than able, of cutting through the cable  
But I see your angel, don't act young and wasteful  
Come to the garden and let your guard down  
Come to your senses it will all be clear

Yeah, yeah (ah)

I tell these stunners I'm stone cold and Austin Powers  
Too busy working, all my niggas talking about power  
I made a vow that I won't end up like Kenny Powers  
When the money goes and friendships turn sour  
Still rapping with soul cause I never sold mine  
For the whole time did it without a co-sign  
They can't approach their shit the way I approach mine  
Dumi knew that he stumbled on a goldmine  
They think you bust and it's all roses and daffodils  
I could have moved off ends, but I'm in Hackney still  
I could have S-curled my hair, my hair is nappy still  
I showed you the most how to make the most out a crappy deal  
Opened doors everybody getting signed now  
I'm having dinner with greatest of all times now  
I never do it off of the top, still gotta write it down  
Ask the hackers, all the bars is on my iCloud  
Still fresher than Brooke Beckham and Ash Ketchum  
Took my 'ghini back to Plumstead and back to Peckham  
Today's beef then tomorrow your friends  
Rappers follow you, unfollow you, then follow you again  
Don't let no writers in my ghost sound borrow no pen  
I tell him a man his face I got a problem with him, straight  
Uh, I can take your girl in woven sandals  
And turn her to Naomi Campbell  
Horror stories, I'm so weary of divorce  
I might move to North Korea because my career is headed north  
You ain't see us in the wagon then I swear it was the Porsche  
Take my niggas to LA where this ain't against the law  
I ain't scared of no lawsuit, word to my tailor  
I didn't even ask Calvin when he took us out to Vegas  
They wanna see us down, they don't want see us up  
And when Harry cuts his hair, whole world going nuts

You are more than able, of cutting through that cable  
But I see your angel, don't act young and wasteful  
Come to the garden and let your guard down  
Come to your senses it will all be clear  
I just wanna be the light you wanna see  
The star in your eyes, the glimmer in the shadow  
I just wanna be the light you wanna see  
The star in your eyes, the glimmer in the shadow

Let me roll with you and I can find  
Let me roll with you, all the pieces in your grand design
