

Switch

Tink

Oh yeah yeah yeah yeah, ohhh, yeah

If I gotta ask you twice (Twice)
Then I know something ain't right, right
Who you fuckin' on the side (Side)
I know you about to lie, lie
All these niggas on my line
But 2 wrongs they don't make a right (right)
Something you should keep in mind (Something something)
I could switch at any time, any time

Who said I needed perfect
Just don't do me dirty
Show me that you're worth it, yeah
You say that you've changed
Well show me a different person
Go below the surface yeah
You know I bend over backwards
Give you everything you ask for
Life done got upgraded
Puttin' stamps all in your passport
Wildin' shit you've ever seen
Only bitch to give you everything
Don't you lie to yourself
Forget where you came
Went through heaven and hell
So when you talkin' back to me
You better know one thing

If I gotta ask you twice (Twice)
Then I know something ain't right, right
Who you fuckin' on the side (Side)
I know you about to lie, lie
All these niggas on my line
But 2 wrongs they don't make a right (Right)
Something you should keep in mind (Something something)
I could switch at any time, any time

Talk to me like you crazy
Boy you talkin' like you lost your mind
All this shit didn't phase me
But tonight you done crossed the line
I've been lettin' shit slide
Down by the waste side 'cause you don't want the old me
Darkside back 2012 yeah say hello to the old T
It was cool until it went bad
You gone make a bitch get her wig snatched
Had me pullin' up to get my lick back
I need every dolla I spent back
Don't you lie to yourself
Don't forget where you came
Went through heaven and hell
And I ain't goin' back again
That shit just ain't happenin'

If I gotta ask you twice
Then I know something ain't right (Something ain't right)

Who you fuckin' on the side (Who you fuckin' on the side)
I know you about to lie, lie (Don't lie to me)
All these niggas on my line
But 2 wrongs they don't make a right (Right)
Something you should keep in mind (Something something)
I could switch at any time (Any time)
