

Used 2 Know

Tink

Careful who you call your homies
Seems like everybody changed on me
People that I used to know
They don't come around no more
Ever since we made it
Friends that I once knew look at me different now
Since we made it
I'm getting random calls from family thats from out of town

Ya day ones be the main ones that will talk down when you're not around
If you let 'em in, and it's all bad cause we go back
And I doubt that we were too close, for the jealousy
And you hate that we don't talk much
Should of call more, should of made time, that's true
I should of did that, could of did that, would of did that, but you know the phone works two ways

So Don't get offended when I can't really hang for the night
We'll be alright, just know that I'm chasing that dough
I got you as soon as I blow, blow

Careful who you call your homies
Seems like everybody changed on me
People that I used to know
They don't come around no more
Ever since we made it
Friends that I once knew look at me different now
Since we made it
I'm getting random calls from family, thats from out of town

So I lay low 'cause I don't know who to trust now
'Cause I'm on now and you ain't it
For me to fall off, pull it all off, it's a sad thing, love strange when you make it
All you had to do was say something
I never forget where we came from
Even with the money, the fame and the fortune
The face I'm wearing is the same one (today)

So Don't get offended when I can't really hang for the night
We'll be alright, just know that I'm chasing that dough
I got you as soon as I blow, blow

Careful who you call your homies
Seems like everybody changed on me
People that I used to know
They don't come around no more
Ever since we made it
Friends that I once knew look at me different now
Since we made it
I'm getting random calls from family, thats from out of town
