Soft Spot

Tiny Moving Parts

Let's breathe each other in
Let's breathe each other in

Midwest like a tundra
The sun doesn't touch us
Seems like we're frozen all the time

Try to stay high
Feel the warmth inside
Before your bones slowly paralyze
I need your skeleton

I need your skeleton

There is a soft spot for you underneath my skin
I'll never be content unless you sink in
I want to be the breath inside of your lungs
So let's breathe
Let's breathe each other in

You're just like a movie with no proper ending
Seems like a purpose we'll never find

Try to stay high
Feel the fresh air rise
Before your plane fractures in the sky
Trickle to the ocean
Come on down

Trickle to the ocean
Come on

There is a soft spot for you underneath my skin
I'll never be content unless you sink in
I want to be the breath inside of your lungs
So let's breathe
Let's breathe each other in

Let's breathe
Let's breathe each other in

I cannot process anything until we become one
Nor speak another sentence without words from your tongue
My muscles have frozen, but I swear this is love

There is a soft spot for you
There is a soft spot for you
There is a soft spot for you
There is a soft spot for you

There is a soft spot for you underneath my skin
I'll never be content unless you sink in
I want to be the breath inside of your lungs
So let's breathe
Let's breathe each other in
