

On the Street

Titus Andronicus

There's too many police on the street
The people never know any peace
They're even watching when you're asleep
There's too many police

There's too many police on the beat
Beating people with impunity
For no reason anyone can see
There's too many police
Too many police

Too many police on the street
Too many police on the street

Too many police
The people don't know no peace
There's too many police on the street
And they're all after me
All after me
All after me
Too many police

And there's always someone after me
Yeah
