

## Firefly

TNT

Out of breath in my mind i need a window  
Something real, something fresh as air  
Left this world on a psycadelic joyride  
Only thing is that i got nowhere  
Dig down to the center of my universe  
Yeah for something i don't even know, no  
You're the wing, the prayer that i been hoping for  
Can you tell me why you hide so low

I am I said inside your head  
It's only you & I, I am your firefly

Without you there's no me I'm not together  
And my stupid little brain's too slow  
So I wait till you come out and play again  
Why the hell can't I take control

I am I said inside your head  
It's only you & I, I am your firefly  
I am I said inside your head  
It's only you & I, I am your firefly  
I am I said inside your head  
If I'm not fed this golden flame will die  
And all your words will lie  
I am your firefly
