

The Constant Changing State of Us - Gold

To Kill a King

When I'm in love, I'm most helpless
No use in swimming against this tide or flow
When I'm vulnerable I appear as stone
Braced and still for any blow

So you know what I mean when I say love will change
So you know what I mean when I say love will change

When I'm wrong I can be too slow to know
And when I'm needed I feel at my best
When chips are down I'm loyal as a dog
When I'm with my friends I feel like king

So you know what I mean when I say love will change
So you know what I mean when I say love will change

If you hold on too tight
Then you will lose sight

When I'm cornered I can be wicked
Burn every good word I ever said
When I hit the stage I come alive
Like a different man hidden inside

So you know what I mean when I say love will change
So you know what I mean when I say love will change

If you hold on too tight
Then you will lose sight

And we're all messed up in the search of gold
All messed up in the search of gold
All messed up in the search of gold

If you hold on too tight
Then you will lose sight

And I'm at my worst in the search of gold
At my worst in the search of gold
At my worst in the search of gold

At my worst in the search of gold
At my worst in the search of gold
At my worst in the search of gold

If you hold on too tight
Then you will lose sight

So you know what I mean when I say love will change
You know what I mean when I say love will change
