

# Queen of Scars

Toadies

Welcome back queen of scars  
I can't say that I've missed you  
But here you are  
And lips that used to kiss you  
Now curse your name

Little names on your skin  
A map of our history  
Queen of scars  
Now I can't help but to see  
You're everywhere I turn

Yeah

I saw you put together  
I watched you fall apart  
We did some soul searching  
I saw what's in your heart  
And now we're right back to the start

So welcome back  
Queen of scars

So tired of lyin  
So tired of tryin  
To bring it all back together

Queen of scars  
Just let the pieces fall  
Just let em fall

I saw you put together  
I watched you fall apart  
We did some soul searching  
I saw what's in your heart  
Now we're right back to the start

So welcome back  
Queen of scars  
I can't say that I've missed you  
But here you are  
And lips that used to kiss you  
Now curse your name
