

# You Know the Words

Toadies

You know the words you want to say  
It's in your touch and on your face  
You know the words, you know the words  
You know the words, you know

You know what's down inside is real  
And you know what I need to hear  
You know the words, you know the words  
You know the words, you know

I feel alive when you're around  
You get me high when I get down  
You know the words, you know the words  
You know the words, you know

I feel it way down in my heart  
I think it's tearing me apart  
You know the words, you know the words  
You know the words, you know

I love you

So pick me up and put me down  
Let me fall into the sound  
You know the words, you know the words  
You know the words, you know

Come on make me feel alive  
Say it loud, say it right  
You know the words, you know the words  
You know the words, you know

I love you

I love you
