(I don't know why why you love me
I don't know why why you love me
I took a pill on the way there
Had to go bye-bye you feel me?)
(I don't know why why you love me
I don't know why why you love me
I took a pill on the way there
Had to go bye-bye you feel me?)

I don't know why why you love me
I'm in the cut getting ugly
I took something on the way there
Had to go bye-bye little buddy
I'm getting straight to the money
I think my day getting sunny
But now my nights getting lonely
I might just need you to hold me
Where would I be without you?
I still only think about you
I guess I'm a little bit drunk now
I'm in the bitch singing Ja Rule
I'm feeling good. How are you?
I wouldn't go if I was you
She said "are you trying to roll cuz I got something light as you"
La la la la

I need you more than I would like to admit
So cut the shit and let's just do it again
I'm going going you should go with me
Roll a bit in my whip smell like potpourri
I need you more than I would like to admit
So cut the shit and let's just try it again
I'm rolling rolling you should go with me
In the whip make that bit smell like potpourri

(I don't know why why you love me
I don't know why why you love me
I took a pill on the way there
Had to go bye-bye you feel me?)
(I don't know why why you love me
I don't know why why you love me
I took a pill on the way there
Had to go bye-bye you feel me?)

So cut the shit and let's just do it again

I'm going going you should go with me
Roll a bit in my whip smell like potpourri
I need you more than I would like to admit
So cut the shit and let's just try it again
I'm rolling rolling you should go with me
