

# January December

TOBi

I know our time is precious  
My watch ain't got no time for second guessing  
When I'm in it hmm  
Crossing intersections, looking in both directions  
Like a speeding bullet, you struck  
Excuse me miss, listen  
I rather ask for permission than forgiveness  
Lord is my witness, call me in every instance  
January December  
I be here all year, all year  
And speaking of Decembers  
I need you through the winters, for sure

For sure  
December is for lovers  
December is for lovers, yeah yeah

Speaking of December, do you remember  
Like a Merry Christmas, you, so very gifted  
In the mix with spinsters, I stand fixated at the fixture across the room  
If you a diamond put your right hand up  
If you shining put your right hand up  
You so fine you make the boy man up  
You so fine you split the boyband up  
You don't have to be nice all the time  
You don't have to be quiet all the time  
You don't have to be right all the time  
You don't have to be...

You just have to BE

December is for lovers  
December is for lovers  
December is for lovers

Come around me  
Goddess of the summer  
Winter's undercover  
Now we're getting colder  
Goddess of the summer  
Winter's Undercover  
December is for lovers  
December is for lovers

Wash it down with a Riesling  
All this love in the air make me sick  
Yeah this is that  
Vitamin C season
