

You left your courage laying on the floor
Too hard to know what to stand up for
You're feeling hopeless
So out of focus

You wonder why you never find the truth
When all you do is run away from you
Your shell is broken
So baby, just let the light in

Come out, come out
Wherever you are
Come out, come out
I'm never too far away, love

Come out, come out
There's nothing to fear
Come out, come out
I'll always be here, love
Out of the shadows
To where the lights glow

You acting cool like you just don't care
You're not fooling me cause I've been there
Some days get so rough
I'm telling you you're good enough

Come out, come out
Wherever you are
Come out, come out
I'm never too far away, love

Come out, come out
There's nothing to fear
Come out, come out
I'll always be here, love
Out of the shadows
To where the lights glow

All of your colors you will be showing
All of your light so dim could be glowing loud and proud
Picture it now, oh babe, don't you see it
Beautiffulness inside, so let it out

Come out, come out
Wherever you are
Come out, come out
I'm never too far away

Come out, come out
There's nothing to fear
Come out, come out
I'll always be here, love
Come out, come out
And stand up straight
Come out, come out
I know you're so brave

Come out and let the world be amazed
Trust me cause I know
You're meant to be where the lights glow
