Come Alive

Todd Dulaney

We've come alive in You, come alive in You
Ever since You took the shame away
We've come alive in You, come alive in You
And we'll never be the same again

The only one who brings life
Into dead and make it rise again
Takes the old things, makes them brand new
Takes the filthy, makes it clean
I'm singing loud now 'cause we're alive
And You've given us a song to sing
We can't keep silent 'cause there are some
That still need to be set free

Come on sing it, we're getting stronger

We're getting stronger
With You there's greater
Here we go, we've come alive

We've come alive in You, come alive in You
Ever since You took the shame away
We've come alive in You, come alive in You
And we'll never be the same again

We've come alive in You, come alive in You
Ever since You took the pain away
We've come alive in You, come alive in You
And we'll never be the same again

Clap your hands like this
I'm singing loud, oh God

Singing loud now 'cause we're alive
And You've given us a song to sing (Can't keep silent, no)
We can't be silent 'cause there are some
That still need to be set free

Come on, we're getting stronger now

We're getting stronger (With You it's great)
With You there's greater (We feel Your power)
We feel Your power (Ooh!)
It's rising in us

Come on, come alive

We've come alive in You, come alive in You
Ever since You took the shame away
We've come alive in You, come alive in You
And we'll never be the same again

We've come alive in You, come alive in You
Ever since You took the pain away
We've come alive in You, come alive in You
And we'll never be the same again

Come on say it, we're getting stronger now

We're getting stronger (Oh yeah)
With You there's greater (We feel Your power)
We feel Your power (It's rising in us, say it)
It's rising in us (Come on, we're getting stronger, say it)
We're getting stronger
With You there's greater (We feel Your power)
We feel Your power (It's rising)
It's rising in us

Ooh, come on
Let me hear those hands
We're alive in here tonight
Come on let's try this out

Oh-oh, You make all things new
You gotta say it
Whoa-oh, You make all things new
Come on lift it up, every voice say "Oh God"
Whoa-oh, You make all things new
Every voice lift it now, now
Whoa-oh, You make all things new
Lift it at your God
Whoa-oh, You make all things new
Whoa-oh, You make all things new
Alright here we go, come on

We've come alive in You, come alive in You
Ever since You took the shame away
We've come alive in You, come alive in You
And we'll never be the same again

We've come alive in You, come alive in You
Ever since You took the pain away
We've come alive in You, come alive in You
And we'll never be the same again

Here we go, here we go

You're free now go
Hey, you're free now go
Hey, yeah
