

Something from Nothing

Todd Rundgren

Staring down a dry hole
That used to be a well
This town has dried up long ago
There's no tale left to tell
I am the sole survivor
Each day I search the sky
And never a rain cloud goes by

I have faith
I have faith
What is faith?
Something from nothing

I live without companionship
Nobody takes this road
It doesn't lead anywhere
Since they closed the motherlode
I gaze at the horizon
Until it hurts my eyes
And never a soul passes by

I have faith
I have faith
Without faith
Then there is nothing

But with faith
I create
Something from nothing

And inside every atom
There is naught but empty space
Why does the sight of rainbows
Put a smile upon your face?
And how do you become yourself
From a little tiny ball
The answer is nothing at all
The answer is nothing at all
The answer is nothing at all

Just have faith
I have faith
Without faith
Then there is nothing

But with faith
I create
Something from nothing

I have faith
I have faith
Without faith
Then there is nothing

But with faith
I create
Something from nothing

Something from nothing
