

It's in the air, it's on the streets, it's in the newspapers
Blood on our hands, it's on repeat, you just can't escape it
Call up my friends, they already scared, I don't have the answer
Wish I had the answer

When the night gets so lonely, it's hard to forget
I make up a place where the sun always sets
Where people feel love
And live life without threat

I'm just a dreamer
I still believe in better days
Somewhere in the future
No matter what they say
Try to look up, oh, when life pulls you down
I know it is rough when the noise gets too loud
But I see ya
You were a dreamer too

One step at a time, blind leading blind, we gotta pave forward
Erase all the lines what's yours and what's mine, love don't have any
borders
Can't win a war you already lost when you pick up a sword
When you pick up a sword

When the night gets so lonely, it's hard to forget
I make up a place where the sun always sets
Where people feel love
And live life without threat

I'm just a dreamer
I still believe in better days
Somewhere in the future
No matter what they say
Try to look up, oh, when life pulls you down
I know it is rough when the noise gets too loud
But I see ya
You were a dreamer too

I'm just a dreamer
I still believe in better days
Somewhere in the future
No matter what they say
Try to look up, oh, when life pulls you down
I know it is rough when the noise gets too loud
But I see ya
You were a dreamer too

I'm just a dreamer
No matter what they say
