

# We Found Us

Tokio Hotel

Fire in the sky, shadows unite  
The world is outside, we hide  
Beats fight a war  
Close the door, close the door  
Searching for the cure on the floor

We found us, us  
In this club, club  
We found us, us  
It hurts but it feels right

Tears falling down  
Underground, underground  
Following the sound of the crowd  
Reflection of the light  
In your eyes, in your eyes  
We are rising high, tonight!

We found us, us  
In this club, club  
We found us, us  
It hurts but it feels right

We don't care, we don't care  
It hurts but it feels right

We found love in this club tonight  
We found love in this club tonight  
We found love in this club tonight  
Girls and girls and boys and boys

We found us, us  
In this club, club  
We found us, us  
It hurts but it feels right
