

## Forged In Hell's Fire

Tokyo Blade

Welcome to the depths of our world  
Welcome to all of those familiar sounding words  
Such a long time we were searching for the key  
To believe is worth fighting for  
If you all are wondering, if you all start listening  
We'll tell you where have been, we'll make you see what  
we are

We're forged in hell's fire - proven by good and bad  
We're forged in hell's fire - the blood, the sweat and  
tears  
We're forged in hell's fire - the game is back on track  
We're forged in hell's fire - the blade is coming back!

Watch out, beware of the pretenders  
Watch out, take care cos they love to see you fail  
If they are wondering, if they stopped listening  
We'll tell them where we have been, we'll make them see  
what we are
