

# Make It Through The Night

Tokyo Blade

You captured love in your every motion  
I'm sinking fast in your lonely ocean  
You're a siren of the night  
And I'm sailing to your light  
To your light...

The one and only in a slow motion dream  
This love of ours will never fade away  
I call to you with a silent scream  
Stay with me for another day

I'm cloud cruising when I'm in your arms  
You took me in with your feline charms  
You hit me low, that's a physical thing  
You got a tongue like a scorpion sting

Can we make it (Make it) through the night  
Is it real or just s dream  
Can we make it (Make it) through the night  
Together, we're gonna be alright

We keep running but we go nowhere  
You move me but you're standing still  
We take it slow and then we're there  
Take a step at a time to the top of the hill

I'm cloud cruising when I'm in your arms  
You took me in with your feline charms  
You hit me low, that's a physical thing  
You got a tongue like a scorpion sting

Can we make it (Make it) through the night  
Is it real or just s dream  
Can we make it (Make it) through the night  
Together, we're gonna be alright

I'm cloud cruising when I'm in your arms  
You took me in with your feline charms  
You hit me low, that's a physical thing  
You got a tongue like a scorpion sting

Can we make it (Make it) through the night  
Is it real or just s dream  
Can we make it (Make it) through the night  
Together, we're gonna be alright
