

Burnt Out

Tom Aspaul

You could run to me
Like you know you should
But you never will
I dress up for you
Made a change or two
You don't love me still
I got sick on you
I got sick of you
Rub that salt in deep
I never been depressed
And then summer passed
And it got to me

Ooh wow, look at us now
Looking for the next door out
We've been here for seven years
(Just think about it)
You go underground
I go over and up and out
Hiding from you endlessly

You can see it
So why don't we do something?
I'm wasting away to nothing
Take a good look at me
You'll see how much I've changed

Burnt out, like a car
I'm surprised we made it this far
We should really get it together
We can't because
We're burnt out, like a star
Dragging me back to you and my heart aches
Nothings gonna stop this from ending

You used to run to me
Like you know you should
But you never will
Every mistake we make
We let our hearts just break
And carry on like this

Ooh wow, look at us now

Looking for the next door out
Is there any point in this?
(Just think about it)
You go underground
I go over and up and out
Hiding from you endlessly

You can see it
So why don't we do something?
I'm wasting away to nothing, nothing, nothing
Take a good look at me
You'll see how much I've changed

Burnt out, like a car
I'm surprised we made it this far
We should really get it together
We can't because
We're burnt out, like a star
Dragging me back to you and my heart aches
Nothings gonna stop this from ending
Nothing because
We're burnt out, like a car
I'm surprised we made it this far
We should really get it together
We can't because
We're burnt out, like a star
Dragging me back to you and my heart aches
Nothings gonna stop this from ending

Why can't you see it?
Why can't you see it too?
Why can't you see it? Oh
Why can't you see it too?
Why can't you see it
Why can't you see it too?
(We should really get it together)
Why can't you see it? Oh
Why can't you see it too?
