

It's Over

Tom Chaplin

Our love began in a winter
Gave way to a springtime
A glorious summer too
And how I remember the feeling
You were a young thing
Oh how I had longed for you

Love without question
A home for my heart
And someone to stop me
From falling apart

And every time I saw your smile
I thought my heart would jump a mile
And I knew that all the hurt
It was over

But time flies and changes the season
It offers no reason
And it suffers no saving grace
I hope that the impossible feeling
Could weather a lifetime
And I die in your warm embrace

We never questioned
The road stretching on
Till one day we woke up
And somehow it was gone

Oh, how this life can drift on by
I watched the love between us die
And I knew down in my heart
It was over

Now every time I see your face
My heart breaks in a different place
And I know down in the dark
That it's over
It's over
