

## Every Mile

Tom Jones

Every mile I made down  
Every lonely highway  
Each and every byway  
You're still on my mind

And every step I take  
Only leads to nowhere  
No one that I know there  
Nothing at home to find

Every hour away  
Seems more like a day  
Every day seems to last  
Forever

And every night I dream  
That we are back together  
Vowing that we'll never  
Be apart again

How real it all can seem  
But then I awaken  
With that same old aching  
In my heart again

Crying, "I will come to you  
If you every call  
If I have to crawl  
Every mile"
