

# Woman You Took My Life

Tom Jones

Woman you were good to me  
In every single thing for me that you could do  
When I could see no point in going on  
Left myself of knowing that another day I'll see you

In my need I reach for you  
A steady hand to lead me through a darkest day  
You took me running chasing after better things  
The laughter of another day  
Imagine how I felt when I have found  
You had gone away

Woman you took my hopes, you took my dreams  
Woman you took my love, you took my sleep  
You left me nothing else to do  
But turn around and start anew  
Woman when you walk out  
You took my life away with you

Through haste of fantasies, fears of uncertainties  
You came to me, a reason to be going on  
A hope when hope and minute gone  
A world in me it had to be  
Imagine I how I felt when I have found  
You had gone away

Woman you took my hopes, you took my dreams  
Woman you took my love, you took my sleep  
You left me nothing else to do  
But turn around and start anew  
Woman when you walk out  
You took my life away with you.... [x2]
