

Been There (Freestyle)

Tom MacDonald

Let's take it back to the jump
Let me tell you where I'm coming from
Let me tell you where I'm coming from
You ain't dead to me now
You ain't dead to me now, nah you been dead
Yeah you been dead
And I ain't been around, now I'm back in this town
I been telling them I'm down and they just keep on telling me t
hey been there

They just keep on telling me they been there
They just keep on telling me they been there

How the fuck you haven't trust me?
Couple dozen bitches who love me
Only one who matters is in another country
A million fucking miles down the road
A million fucking miles down the road

And they just keep on telling me they been there
They just keep on telling me they been there, there, there

Fast forward through the bullshit
Still hung up on some 'mo shit
Still sleeping in my accident
And waking up bad dream mad again
Bad dream mad again
Bad dream mad again

And they just keep on telling me they been there
They just keep on telling me they been there

How the fuck you haven't know
You ain't ever been here
You ain't ever been here, for sure
