

# Free World

Tom MacDonald

They keep tryna divide us, America looking like communist China  
Got us arguing over election results and if boys have vaginas  
And the healthcare system making people so broke they can't pay those  
bills  
They don't even care if you're sick no more, 'long as you got money y  
ou should take those pills  
Distracted by systemic racism, you can't convince me that concept is  
real  
That's propaganda from the left-  
wing news, while everyone stands with black people  
I don't vote, I don't trust in Donald Trump or Sleepy Joe  
Took our soldiers out Afghanistan, they're homeless when they're home  
, that ain't woke  
The government claiming "In God We Trust", but I think that it's hors  
e shit  
Let me take that back, that's facts, but it's a different god that th  
ey worship  
They tryna control us, they trying to force us, we living in hell  
If their religion means violence and killing, maybe they should start  
with themselves

What happened to the free world?  
The land of the brave, but y'all are afraid  
What happened to the free world?  
Used to fight for our sons, now we hide and we run

Soldiers die overseas so you're free  
Show the flag, you get mad so you knee  
So unique how you scream over me  
Don't get too close to me, I carry openly  
You talk loud but we know you soft and you ain't even got a backbone  
A young kid left to protect your neck and he ain't never coming back  
home  
I miss the old days when we'd disagree, but at least we still had pat  
ience  
But if I don't think how you want me to think, you turn around and ca  
ll me racist  
Let's not fight, everything's all good, unless of course you white  
That's not right, I will never say "I'm sorry". That's just life  
How you gonna act like a grown-  
ass man but you really never had no job?  
Why you getting mad? I ain't wearing no mask and I ain't trying to ta  
ke no shot  
The next few years gonna be rough  
Better have thick skin, tree trunk  
What they gonna do when we come?  
Better own more than three guns

What happened to the free world?  
The land of the brave, but y'all are afraid  
What happened to the free world?  
Used to fight for our sons, now we hide and we run

While you're playing victims and blame politicians  
For everything fucked up, we stay screaming "Fuck the system"  
Shut up, you should listen, you think that you're different  
But you're just fucked up, fucked up

What happened to the free world?  
The land of the brave, but y'all are afraid  
What happened to the free world?  
Used to fight for our sons, now we hide and we run
