

# High On You

Tom MacDonald

I could be your Xanax, I could be your Adderall  
Drop me like acid, you feel like alcohol  
Cool like a menthol cigarette with the windows down  
You are the high I won't forget  
You're gonna need rehab, oh  
To get over me, oh, oh  
Yeah, you're probably gonna relapse, oh  
You need dopamine

Oxytocin  
You're inside my veins  
Your endorphins take away my pain

I'm high on you  
I'm so high when I'm with you  
I'm so high on you

I can be your Valium, I could be your ecstasy  
I could be your bad habit, I could be your nicotine  
Cool like a menthol cigarette, you can't put me down  
Ooh, I'm the night you won't forget  
You're gonna need rehab, oh  
To get over me, oh, oh  
Yeah, you're probably gonna relapse, oh  
You need dopamine

Oxytocin  
Did I make you in my brain?  
It's serotonin, heroin, cocaine

I'm high on you  
I'm so high when I'm with you  
I'm so high on you

You feel like black lights and hashpipes and cars full of smoke  
You make me feel seventeen, amphetamines, we'll never go home  
You feel like morphine, I feel stoned  
You're bad for me, but baby you're dope

I'm high on you  
I'm so high when I'm with you  
I'm so high on you
