

Invincible

Tom MacDonald

I'm the type that'll fall in love too fast
Wake up in the morning and forget that she's important while I'm looking for
a number to a cab
I don't wanna break her heart but I'm gonna, I'm sorry
I been out a lot, drinking in the parking lot before the club
All my favorite rappers have been telling me they turning up
And I just want the bottle service coming back, hurry up
I'm almost tired and faded enough to fall in love

Fall in love with me and I'll show you
What it's like to risk it all on one
Fall in love with me and I'll go to the moon and back just to prove I need y
ou more than air to live

'Cause I ain't invincible
I ain't invincible, I ain't invincible
I ain't invincible and I ain't invincible
I ain't invincible, 'cause I ain't invincible
I ain't invincible, I ain't invince-

I been falling for the wrong type for a long time
They been meeting all types of people and they all kind
And somehow they always give me the benefit of the doubt
And I offer to prove her wrong and then offer to walk her out
Why the contradiction?
What's another late night that we don't know the difference?
What's a couple more drinks and a bad decision
That might lead to what we're looking for

Fall in love with me and I'll show you
What it's like to risk it all on one
Fall in love with me and I'll go to the moon and back just to prove I need y
ou more than air to live

'Cause I ain't invincible
I ain't invincible, I ain't invincible
I ain't invincible and I ain't invincible
I ain't invincible, 'cause I ain't invincible
I ain't invincible, I ain't invince-

I ain't invince-
I ain't invince-
I ain't invince-
I ain't invince-
I ain't invincible

Fall in love with me and I'll show you
What it's like to risk it all on one
Fall in love with me and I'll go to the moon and back just to prove I need y
ou more than air to live

'Cause I ain't invincible
I ain't invincible, I ain't invincible
I ain't invincible and I ain't invincible
I ain't invincible, 'cause I ain't invincible
I ain't invincible, I ain't invince-
