

I like you best when it's just you and me
Sometimes it gets hard to get up and leave
All things go by, loving the only things I've seen
Don't you feel it?
I hope so, I do

Don't feel this time when I'm with you
A hundred days go by and feel like two
Don't feel this time when I'm with you
But every time I leave the room
I know I shouldn't miss you but I do

My friends ask me
Where have you been?
I say, "Oh well
Somewhere it seems"

I'm falling off the map now
Got no time, I'm going back now
And I swear there's nowhere better

We don't feel this time when I'm with you
A hundred days go by and feel like two
Don't feel this time when I'm with you
But every time I leave the room
I know I shouldn't miss you but I do

Don't feel this time when I'm with you
A hundred days go by and feel like two
Don't feel this time when I'm with you
And every time I leave the room
I know I shouldn't miss you but I do
