

Follow Me

Tommee Profitt

Wake the fire inside, we don't need time
To hold us down, we can fly
Feel the future in our lungs, chase the silver sun
Forever young, we can fly

Oh, we can fly

Follow me to the edge of the world
Show you everything you've never seen before
Oh, we're dancing on the skyline
Heartbeats racing in the moonlight
Follow me to the edge of the world
To the edge of the world

Like a current in my skin, pull me closer
Drink the wave, breathe in it
Wild and weightless we are one, time has just begun
Forever young, forever young

Follow me to the edge of the world
Show you everything you've never seen before
Oh, we're dancing on the skyline
Heartbeats racing in the moonlight
Follow me to the edge of the world
To the edge of the world
To the edge of the world
Follow me to the edge of the world

Follow me to the edge of the world
Show you everything you've never seen before
Oh, we're dancing on the skyline
Heartbeats racing in the moonlight
Follow me to the edge of the world
Follow me to the edge of the world
