

Need You To Love Me

Tones And I

I lie awake 'cause I can't, I can't barely breathe
Thinking about how we strayed so hard from what we used to be
Wish I could read your mind but you don't tell me nothing
I'd ask you a thousand times, just to give me something
You had me driving 'round all night, I was running through the streets
I was blowing up your phone when you just could've stayed with me and
As the story goes, a girl is in love with a player, but the player loved me

But I gave you all
I gave you all
I gave you all of me

I just need you to love me
Need you to love me
I just need you to love me
Need you to love me
No, I just need you to love me
Need you to love me
No, I just need you to love me
Need you to love me

If you could see me through the eyes you did before
I'd still be the one you'd wanna hold a candle for
I guess as we all grow old, we lose our love some more
But I thought we'd be there too, lasted through it all

'Cause I gave you all
I gave you all
I gave you all of me
I just need you to love

I just need you to love me
Need you to love me
I just need you to love me
Need you to love me
I just need you to love me
Need you to love me
I just need you to love me
Need you to love me

I would have nothing, till you hold my hand
I've been pushed to the limits with the things you've said
And if I had the chance I would meet you again and again
I would have nothing, till you hold my hand
I've been pushed to the limits with the things you've said
And if I had the chance I would meet you again and again

'Cause I gave you all
I gave you all
I gave you all of me
I just need you to love, love me
