

Welcome To The Madhouse

Tones And I

Welcome to a place where you can play
A place where you can bring your friends but you all have to stay
Welcome, we will meet you at the door
You must tell us all your secrets before you can explore

The life you had before is gone that's never gonna change
But we'll all love to hate you and we'll tell you everyday
Beware the air is different when you step inside the door
And smile they're all watching

Welcome to the madhouse
You've never seen a place like this before
Welcome to the madhouse
Where they all come back for more
Welcome to the madhouse

Welcome to a place you've never been
A place you've always dreamed of but here nothing's as it seems
Welcome, let this song take you away
Be careful what you wish for 'cause the creatures like to play

The life you had before is gone, that's never gonna change
But we'll all love to hate you and we'll tell you everyday
Beware, the air is different when you step inside the door
And smile they're all watching

Welcome to the madhouse
You've never seen a place like this before
Welcome to the madhouse
Where they all come back for more
Welcome to the madhouse
You've never seen a place like this before
Welcome to the madhouse
Where they all come back for more
Welcome to the madhouse

It's the place you always wanted but you didn't know you need
The place where people make you swear you didn't hear a thing
The house up in the hidden hills that hides among the trees
The house that takes you far away where no-one hears you

Madhouse (Madhouse)
Madhouse (Madhouse)
Madhouse (Madhouse)

Welcome to the madhouse
