

Last Light

Tonight Alive

You are the last light over the mountain
Bleeding into the waves
You are the dancing rhythm of whitewash
Reflecting golden rays

And I am nothing but your witness
I watch on in awe
I want nothing but to listen
Where you walk, I will walk

You

I do nothing but think of you
And if it's true that you're gone, then I am too
Because wherever you go I'm there
I hope you knew that before you left
I do nothing but think of you

You are the first star in the night sky
You're the spark and the tip of the flame
I have seen your eyes in everything
And they wink as if to say

We are eternal
Don't be afraid
We are eternal

I do nothing but think of you

And if it's true that you're gone, then I am too
Because wherever you go I'm there
I hope you knew that before you left
I do nothing but think of you

And I live in hope though that I know that I won't
Ever hold your hand
That this life is a limitless cosmic dance
And we cry and we see for the life you lived
'Til you make your return
I am forever changed
I'll wait to see you again

I do nothing but think of you
And if it's true that you're gone, then I am too
Because wherever you go I'm there
I hope you knew that before you left
I do nothing but think of you

I live to honor you
I sing to honor you
