

Our Love Is Forever

Tony Christie

We been together since baby, I don't know when
We met when you were just seven and I was just ten
Now is now, that was then

We made a promise that we'd be together for life
You said that I'd be your man and that you'd be my wife
As we got older the storm in our love seemed to grow
So never forget to remember that I love you so
What was then is still now

Our love is forever we thought when we started
I know that I'll never need anyone new
You are the one girl that makes me so happy
To look in the eyes of a woman so true

Every moment we look at each other
I feel your love coming through

Our love is forever
And don't you forget it
You know that it's true
I love just you

The longer that we were together
The stronger we grew
We had our troubles but baby we both saw it through
We been together since baby, I don't know when
If I had my life to live over, I'd do it again
This is now, that was then

Our love is forever we thought when we started
I know that I'll never need anyone new
You are the one girl that makes me so happy
To look in the eyes of a woman so true

Every moment we look at each other
I feel your love coming through

Our love is forever
And don't you forget it
You know that it's true
I love just you

Our love is forever we thought when we started
I know that I'll never need anyone new
You are the one girl that makes me so happy
To look in the eyes of a woman so true

Every moment we look at each other
I feel your love coming through

Our love is forever
And don't you forget it
You know that it's true

Our love is forever we thought when we started
I know that I'll never need anyone new

You are the one girl that makes me so happy
