

That's What Friends Are For

Tony Christie

Pack our bags, head off down the road
Leave behind your troubled heavy load
Grab your keys, lock the door
I could drive a million miles with you
That's what friends are for

Show a tear that's rolling down your face
See the stars that twinkle up in space
Making peace, hating war
I could drive a million miles with you
That's what friends are for
That's what friends are for
