

It Falls Through Me

Tony Iommi

Another cold night in the silence
I never thought you would be leaving
I only wanted to try and make you see
Is there a chance to tell me why
And where do you begin to try?
The battle is over
Mistaken again?

It falls through me
It falls through me

It falls through me

Now in the darkness of my cold room
This time I live alone forever
I only wanted to make you understand
Too late, the gold has turned to rust
You wait, your love lies in the dust
I gave you my spirit
Now this is the end

It falls through me
It falls through me
It falls through me
It falls through me

It falls through me

It falls through me

The battle is over
Mistaken again?

I gave you my spirit
Now this is the end

It falls through me (repeat)

Is there a chance to tell me why

It falls through me
