

## Casket

### Too Close To Touch

This room feels strange with the lights turned on  
There's traces of jealously left over memories spilled on the floor  
It's hard to breathe when the smoke won't clear  
We made the same mess and do it so recklessly each time you're here

You don't get the right to call when you like you gave that away  
Just another lie you push it to the side, yeah you sealed your fate

You put this love in a casket  
Now there's no sign of life  
No way to change my mind  
Didn't give a damn when you had it  
Don't stir the ashes now  
Because this fire is long burned out  
You put this love in a casket

And don't lay blame in the bed you left  
I'm getting sick of this, trying to fix all the things that you wrecked  
You were sure you couldn't be replaced  
Your love is dead to me, she's lying next to me, filling your space

You put this love in a casket  
Now there's no sign of life  
No way to change my mind  
Didn't give a damn when you had it  
Don't stir the ashes now  
Because this fire is long burned out  
You put this love in a casket

You don't get the right to call when you like you gave that away  
Just another lie you push it to the side, yeah you sealed your fate

You put this love in a casket  
Now there's no sign of life  
No way to change my mind  
Didn't give a damn when you had it  
Don't stir the ashes now  
Because this fire is long burned out  
You put this love in a casket
