

Tool - You Lied

Tool

Setting sun can't shine, now you're gone
Inside sleeping, my heart beating
You know that you tried to hide it
Couldn't you have said what you meant? Oh...

Time heals, time congeals around us
Endless hours of wasted moments
Understanding, not demanding
Your eyes tell what you feel inside

Setting sun can't shine, now you're gone
Inside sleeping, my heart beating
You know that you tried to hide it
Shouldn't you have said what you meant?

YOU LIED!
