

Wake up

Toosii

Hey, hello Cindy
How bout you come ride with Danny
Light up one of those blizzies
And we can slip off yo panties
Cause you
Probably don't know that some day
I'ma win a Grammy
And after all of them prizes
Then we gone build us a family
Are you afraid
Only cause a nigga know what the future holds
Granny told me "Boy you getting old
So tip your toes
And make sure you zip your clothes"
For Simon told
If he did what Simon said
If only granny know I shine
But for Simon says
That's far fetched
But I
Preach
As I sit upon cloud 9
And I look as I become closer
Like homie "That's all mine"
I'm gone be somebody
See somebody
I ain't never seen before
Open the gates
A prophet just told me that this was Jesus song
Nia Long
Don't care if we there yet
As long as she along
And she gone be my rider
Cause she would help me
Keep keeping on
Nia Long
Don't care if we there yet
As long as she along
And she gone be my

I think it's time to wake up
Life's getting better
Come and smell the roses
Wake up
You know you gotta come and smell the roses
Wake up
Something told me you gotta see the roses
Reach your destination
And see the roses that you have chosen
Wake up
It's time to see the roses
Wake up
It's time to see the roses
Reach your destination
And see the roses that you have chosen

Wake up ooo

Smell the roses
Holyfield in the field
She get ghost if you leave her open
(She is no Odell)
Fuck with Aubrey on some [?] shit
And fuck the hoes
Cause they all considered me to be pimping
I ain't pimping
People hate that I curse in every sentence
I get tempted
Can't get mad just because they do not listen
It's commitment
Bust my ass
As if I ain't pay commission
Working nine to five
Just to come home to a sink of dishes
Kick it, kick it
Kicking shit with the new lil bitches
Chickens in my phone
But I rather them be up in my kitchen
Living life like Moses
Package full of some [?]
So Granny won't never know that
The zipper to pants open
We can't have no baby
Lately feeling
Like bitches drive me crazy
You ain't really hate me
You only was mad
Because you ate me
Feel the tension
I just built her arch
Like my name was Noah
Heard her name was Lola
She bite me like she was from the N.O., yeah
