

## Future Waits

Tops

The future waits for no one

You never took even one step forward  
Before you'd ask for direction  
And then you drag me into this mystery, when did you become  
So full of, full of misconceptions?

Wearing a chain that's missing a pendant  
Who's at my back trying to unclasp?  
I wish I could bask in the sun of a day past  
But the future waits for no one

I thought that I lived to dream  
Until recently dreams leave me stranded  
Thought if I could learn all the twists and turns, I wouldn't yearn  
For greener pastures, find my ever-after

And never look back  
(And never look back  
And never look back  
And never look back  
And never look back)

Who's at my back trying to unclasp?  
I wish I could bask in the sun of a day past  
But the future waits for no one

The future waits for no one
