

## Believe It

Torche

Beginning start over  
Today it's what we've done  
And end in tears no faults  
Feel it we become

You better believe it

Hoping the future is all  
Everything you thought  
Don't let it go on too long  
And let it drift us apart

It's better to leave it

All your filters are gone  
Say it's what you want  
All conditions and thoughts  
Take us where we are
