General Joy

General joy I know I know You'll take me there -Where your boys were left behind General joy it seems you need A soldier girl -Now "they" have liberty gagged By boat by tram by motorbus Could it be the fates are protecting us From the hawks that have stolen the bird from the sky And I know You will always love sorrow Is that why You gave her dress to happiness? 'Cause it matches her eyes When she cries General joy it seems You don't love your bride Generally You're friends but she is not the love of your life To dye to perm to change your hair or your wife The posssibilities are there And it's time for you to decide General joy I know I know You'll take me there -But you'll need strength From within General joy it seems you need A soldier girl -And a willing coalition By boat by tram by motorbus Could it be the hawks are protecting us
