

Never Seen Blue

Tori Amos

Some boy you are
To take me by the hand
Through an elevator
Gotta a little red light
That tells you, boy
Where the razor's been

You said, girl if you think
You can turn that violator
You'll finally be that woman, yes
Finally be that woman
That's been frozen in the pretty silver girl
Yes

And I've never seen blue
Like the blue she drives
In and around
And through me again
I said I've never seen eyes
Like the blue she drives
In and around
And through me again
Through me again
Through me again

Some boy you are
To wear my color red
To wear it very proudly
And wear it like a lady
Knows how to cross her legs
Where the birdy's been

I've never seen blue
Like the blue she drives
In and around
And through me again
Said i've never seen eyes
Like the blue she drives
In and around
And through me again
Through me again
Through me again

Said now that I am
Say goodbye to those left
Say...
