

Hope Garden

Tori Kelly

You say that change is taking place
We are like to be spun
Rousing your life stirring your mind
Something new has begun

I'm in tune with the soil and the ground
You're entice by the wind [?] sound
I've somehow wonder here
Don't get to hooked my dear
That was my way of thinking before
Now I see there's a lot to explore
Lasso the sun if you want more

Love is sprouting below
From the seeds that we sow
I'll stay in this garden of hope
Darling when this will rise
Only God can decide
Just keep watering all the good we find

Want you to stay I know we can wait
To see where this will go
We've seen it blossom seen it thrive
Watched it withered fade and died
Love comes in ever shape and size
But when it's true it fits just right

Love is sprouting below
From the seeds that we sow
I'll stay in this garden of hope
Darling when this will rise
Only God can decide
Just keep watering all the good we find

Oh the sun is on our side
I will hold on tight
Darling stay inside
The moments that shine

Love is sprouting below
From the seeds that we sow
I'll stay in this garden of hope
Darling when this will rise
Only God can decide
Just keep watering all the good we find
Just keep watering all the good we find
