

# North Star

Tori Kelly

Someone shook the snowglobe around  
Turned the whole world upside down  
Landed us so far apart  
Me down here and you up in the stars

The trees are decorated  
The pretty bows are tied  
The television's playing  
It's a wonderful life  
And even though I miss you  
Part of you's still here  
So in a way I'm with you  
At the most wonderful time of the year

I'm always looking up  
'Cause I can feel your love, and I  
Know just where you are  
In the sky and in my blood  
And I've never been to heaven  
But it doesn't seem that far  
'Cause you're my north star  
You're my north star  
You're my north star, yeah

All things considered  
We're all doing fine  
Setting up the table  
Mama's pulling out the pies  
Everybody's laughing  
Telling all your jokes  
There's ribbons of sadness  
But it still feels like home

Wherever you are  
I hope you know

I'm always looking up  
'Cause I can feel your love  
And I know just where you are  
In the sky and in my blood  
And I've never been to heaven  
But it doesn't seem that far  
'Cause you're my north star  
You're my north star  
You're my north star, yeah

You're my north star  
You're my north star

'Cause I've never been to heaven  
But it doesn't seem that far  
'Cause you're my north star  
You're my north star  
You're my north star, yeah
