## Talk

**Tori Kelly** 

People talk, people talk But they don't wanna say what they're really trying to say Hopes and fears, smoke and mirrors Save all the thinking, words by themselves they just fade People run, people walk But they don't ever see past the world that they're in So if it's talk that you want from me then maybe you should let me in Oh, you keep saying you won't let me go Oh, you keep saying what I've heard before Talk Playing with empty hearts, leading words felt like they're just going no where now So if it's talk that you want from me then maybe you should let me in Oh, you keep saying you won't let me go Oh, you keep saying what I've heard before Oh, you keep saying you won't let me go All I hear is talk I know all about you, know all about you Know all about you You keep saying you won't let me go Talk Oh, you keep saying you won't let me go Talk Oh, you keep saying you won't let me go Talk You keep saying things I've heard before babe Heard before babe Talk
