

Don't Be Afraid

Tors

When I messed up the most
And didn't know where to go
You were there in a beat
Waiting on the phone
I feel like I'm nothing
But then you say something
To keep me on the line
When I ran out of words
And my breath went cold
You would tell me a joke
And laugh along
Always a callback
Helping me fall back
Asleep when I'm alone

You said don't be afraid of the dark
You don't need the light
Because I know who you are
You said I'll always be by your side

We were just two friends drinking white wine
Thinking, getting lost in reminiscing
Lucky just to have you listening
I don't wanna lose that
Not if I can choose

I know were getting older
But I hope it stays the same
We'll be just two friends drinking white wine
Thinking, even when we're old and grey

Is it the way that you talk
When you share too much
And we laugh so hard
We can feel our lungs
You're overly honest
And whether I want it
Or not you set me straight
Because you know I never let you go easy when
You're like a brother more than a friend
Nobody knows me like you

You said don't be afraid of the dark
You don't need the light
Because I know who you are

We were just two friends drinking white wine
Thinking, getting lost in reminiscing
Lucky just to have you listening
I don't wanna lose that
Not if I can choose

I know were getting older
But I hope it stays the same
We'll be just two friends drinking white wine
Thinking, even when we're old and grey

You know I never meant to fall apart the way I did
And I can never thank you for the way you took me in

We were just two friends drinking white wine
Thinking, getting lost in reminiscing
Lucky just to have you listening
I don't wanna lose that
Not if I can choose

I know were getting older
But I hope it stays the same
We'll be just two friends drinking white wine
Thinking, even when we're old and grey
