

# Look At Us

Tors

Call me back  
Before you go  
I know there's more  
To say than we show  
Sometimes I wake up  
Thinking of you  
But most nights I stay up  
Drinking for two

Twenty-two when I let you down  
Twenty-three and you're not around  
Think that I can do better now  
Come and take my heart again  
Fuck it up if you feel that way  
You're my God and it's judgement day  
On my knees but I got my faith  
Hoping you will stay

Look at us  
I know we lost some blood  
But there is still enough  
For us to breathe (Us to breathe)  
I cut my teeth and you will bite your tongue  
I know we got it wrong  
But I believe (I believe)

We start the fire, the fire  
We start the fire, just you and me  
Look at us  
I know we lost some blood  
But there is still enough  
For us to breathe (Us to breathe)

A cigarette covers up  
The space between  
The things that we've done  
You take off your makeup  
Thinking of me  
I'm wishing the breakup  
Was only a dream

Twenty-two when I let you down  
Twenty-three and you're not around  
Think that I can do better now  
Hoping you will stay

Look at us  
I know we lost some blood  
But there is still enough  
For us to breathe (Us to breathe)  
I cut my teeth and you will bite your tongue  
I know we got it wrong  
But I believe (I believe)

We start the fire, the fire  
We start the fire, just you and me  
Look at us

I know we lost some blood  
But there is still enough  
For us to breathe (Us to breathe)

Look at us  
I know we lost some blood  
But there is still enough  
For us to breathe (Us to breathe)

I cut my teeth and you will bite your tongue  
I know we got it wrong  
But I believe (I believe)

We start the fire, the fire  
We start the fire, just you and me  
Look at us  
I know we lost some blood  
But there is still enough  
For us to breathe
